Aston Martin DB5 Vantage

„Goldfinger“

DB5 Vantage - „Goldfinger“

Racing successes and brute performance data of the road models: Aston Martin has always prided itself on being one of the best brands in the sports car segment. If James Bond obviously likes driving Aston Martin, then there must be something to the British brand's quality. The Aston Martin DB 5 is inextricably linked with Sean Connery and the James Bond film „Goldfinger“.

The Aston Martin DB5 Coupe embodies the quintessence of luxury and sports car engineering. From its timeless beauty to its impressive performance, the DB5 is a true masterpiece of automotive artistry. Aston Martin vehicles are handcrafted, ensuring high quality and attention to detail. Each car is carefully assembled by highly skilled craftsmen.

Aston Martin is known for its limited production and bespoke options. This contributes to the exclusivity and rarity of the vehicles, which increases the fascination for collectors and enthusiasts.

A total of 1063 vehicles of the DB 5 were produced in elaborate manual work. Of these, 164 were coupés. The engine is an in-line six-cylinder made of light alloy and the body is made of aluminum. The DB 5 was built from 1963 to 1965.

The car

- 6-cylinder in line
- 3.995 cc
- ca. 329 hp
- First registration 27.07.1965
- 5-gear-box

The vehicle presented here is one of the few in the coveted Vantage version. Compared to the standard engine with 282 hp, the engine produces approx. 329 hp. A value that was only achieved by a few road vehicles at the time.

Many documents and expert reports certify that the vehicle has been extensively repaired and maintained in England and Germany since the 1980s. The current condition is rated 1 - 2 according to Classic-Data.

Price on request. I look forward to talking to you personally.
